Since established in 1999, we, SELCO Steel Products, are one of the renowned manufacturing, supplying and installing an all - inclusive range of office furniture, which includes chairs, tables, storage, Slotted angles & display racks, mezzanine floors, mobile racking system, shelving systems and other allied products. Made using the quality raw material, these products are the preferred choice of our clients for their quality and utility. Backed by sophisticated infrastructure and highly experienced professionals, we are capable of meeting the exact requirement of our clients. Within the infrastructure, we have established a quality control department to ensure that our products are in compliance with international quality norms. Further, we constantly strive hard to upgrade our production facilities and this helps us to increase our production capacity.

The SELCO Heavy Duty Racking System / Racks are basically conventional or adjustable pallet racking, which are the most widely used storage system for all palletised and non-palletised loads. In Heavy Duty Racking System / Racks both single or double-sided runs of racking are separated by aisles which can be sized to suit the customers existing material handling equipments.

Display Racks are fabricated using good quality materials with innovative designs and features. The display racks includes Gondola Wall, Wall unit, End Rack, Cosmetic Rack, Fruits and Vegetables Racks, Crockery Racks, Trolley & Basket Racks etc. These display racks are used in places to keep like libraries, shopping malls, book stores etc. These racks are manufactured with international quality standards and provides awesome look to these racks.

Our organization is reckoned for providing premium quality Industrial Shed. We fabricate these sheds using premium quality raw material that we procure from a trustworthy vendor-base ensuring longer functional life. Versatile and flexible, our industrial sheds are designed to incorporate the best possible use of space, because we understand the importance of using it effectively.

## Mobile Storage Rack

- Easy, sturdy, safe way to move and store tubas and sousaphones
- Racks have four swivel casters for easy transport
- Locking mechanisms on two wheels
- Assembly required • High strength • Superior finish • Huge load bearing capacity

## Industrial Shed

Mobile Storage Rack systems maximize the space utilization by eliminating aisles and compacting several shelving systems into a much smaller amount of space. An aisles or access to your files opened up only when and where you need it by easily shifting entire rows of shelving. Main advantage is only one aisle space we can operate entire racking system where as mechanism with rotating handle with stopper and manual operation as well as motorized system.

This system is mainly used for keeping records & files and valuable items and for component storage. It is always dust free and compact.

This is mostly widely used in all industries such as Pharma and chemical industries, Food and Beverages, Garments, Textile and Accessories, Automobile and Engineering, Electrical and Electronics, Cold storage.
